Profile: Industrial Engineer with an M.Sc. in Industrial Engineering, a master's in digital business, a master's in applied Statistics, and a Ph.D. in Systems and Computer Engineering. Over 6 years of experience in process optimization, machine learning initiatives, and data-driven decision-making. Proven expertise in data analysis, visualization, automation, production scheduling, and statistical quality control. Strong communicator and collaborator adept at translating complex technical insights into actionable strategies, leading cross-functional teams, and fostering continuous improvement in both academic research and corporate environments.

Languages: Spanish (100%), English (70%)

Technologies: Python | R | SQL | Power BI | Tableau | Keras | TensorFlow | Docker | Databricks | Azure | Git | SCRUM | Spark | Rasterio | Geopandas | Excel

Working Experience:

Data Scientist

PepsiCo, Remote, Colombia, April 2022- Present:

- Develop and implement the Demand Model across Latin America to optimize sales forecasts and plan inventory levels
- Design and deploy Cannibalization Models for the Latin American region to quantify the impact of new product launches on the existing portfolio.
- Create and implement Innovation Models region-wide to evaluate the potential of new products and formats in the Latin America market.
- Build interactive dashboards for all Latin American markets to monitor commercial and operational KPIs.
- Designed AI-driven decision systems integrating sales, operations and supply data to optimize inventory, production planning and commercial execution across LATAM.

Senior Researcher

Universidad de Zaragoza Zaragoza, Spain, Aug 2022 - Present

- Conduct research in agriculture, including time series analysis and implementation of machine learning models, applying these techniques in real-world companies to drive data-driven decision-making and optimize processes.
- Acquire, clean, and analyze datasets from various public and private sources.
- Implement models in a web application for time series price prediction in a specific market in Spain to support decision-making of agents involved in pricing affecting the Spanish market.
- Analysis of satellite imagery and application of machine learning models.

Instructor Data

Henry, Remote, Colombia, Jun 2023- April 2025:

- Data analysis and machine learning classes
- Develop and support the development of new careers and final projects.

Data Scientist

iFood, Colombia Jun 2019 - Dec 2021

- Achieved high on-time delivery rates by deploying predictive models for demand forecasting, optimizing driver availability, and reducing delays.
- Enhanced order fulfillment accuracy and security by implementing automated anomaly detection systems, significantly reducing incorrect or fraudulent orders.
- Increased customer retention and engagement through personalized recommendation systems and targeted promotions, leading to higher order frequency.
- Optimized and maintained model efficiency by designing and deploying automated pipelines for data ingestion, preprocessing, and retraining.
- Implemented scalable cloud-based machine learning models ensuring high availability, low latency, and seamless business integration.

Professor

Universidad Del Norte Barranquilla, Colombia Aug 2019 - Dec 2020

- Teach statistical quality control and industrial safety.
- Participate in research groups focused on data analysis and machine learning algorithms.
- Conduct research targeting social problems in Colombia where machine learning algorithms can be implemented to foster community learning.

Secondary School Mathematics Teacher

Institución educativa Alvernia Puerto Asis, Putumayo, Feb 2016 - Dec 2017

- Teach mathematics to secondary school students, including classes for people deprived of liberty in the prison system and adult education on Saturdays.

Education:

PhD in Systems and Computer Engineering

Universidad de Zaragoza
Zaragoza, Spain, 2025

Data Analytics

Digital House (Remote), 2023

Master In applied statistics (Student)

Universidad de Nariño
Nariño, Colombia, 2026

MSc in Industrial Engineering

Universidad del Norte Barranquilla,
Colombia, 2020

Master Digital Business

Escuela de organización
Industrial (EOI)
Zaragoza, Spain, 2024

Data Science For All DS4A / Colombia 3.0

Barranquilla, Colombia, 2020

Industrial Engineer

Universidad tecnológica de
Pereira, Colombia, 2015
